

# NO EQUIPMENT HOME WORKOUTS: AEROBIC WORKOUTS

Engaging in aerobic exercise inside and without equipment can be challenging for those that have not exercised in this way before. If you have access to a treadmill, stationary bike, or other piece of aerobic equipment, you can of course use that mode of aerobic conditioning. For those without such equipment, this guide can serve as a means for exercisers at any stage to maintain and improve their aerobic fitness.

Herein are weekly workouts for those that wish to train 2, 4, or 6 times each week. Each of these programs includes ways to make the exercises harder or easier depending on your fitness levels.

In addition to this aerobic exercise program, strength training is necessary for maintaining good health as well as helping stay fit and de-stress while we're all at home. See the following pages and select the workout that is most appropriate for you. Above all, listen to your body and use your best judgement when approaching an exercise program on your own.
